*Pisces* [मीन (Mīna); quality Dvisvabhava (dual)] is the twelfth astrological sign in the Zodiac, which originates from the *Pisces* constellation. In astrology, *Pisces* is considered a “feminine”, negative (introvert) sign. It spans 330° to 360° of celestial longitude. Under the tropical zodiac, the sun transits this area between February 19 and March 20. *Pisces* is also considered a water sign and is one of the four mutable signs.

Traditionally ruled by the planet Jupiter, but since its discovery, Neptune has been considered a modern ruler of this sign. Being the twelfth sign, *Pisces* is associated with the astrological twelfth house.

According to one Greek myth, *Pisces* represents the fish into which Aphrodite and her son Eros transformed in order to escape the fire god Typhon; they are tied together with a cord on their tails, to make sure they do not lose one another. In classical interpretations, the symbol of the fish is derived from the ichthyocentaurs, who aided Aphrodite when she was born from the sea.

*Pisces* is the first **10 Echo** release and experiments with ambient psychedelic noise overtones. *Pisces* was released March 27, 2015.

The spring equinox, March 21, is the beginning of the new zodiacal year and *Aries* [ เมษ (Meṣā) meaning “ram”; **quality** Chara (movable)] is the first astrological sign in the Zodiac, spanning the first 30 degrees of celestial longitude ( $0^\circ \leq \lambda < 30^\circ$ ); and is named for the constellation of *Aries*, called “*The Ram*” based on the Chrysomallus. in the Greek mythology, after the flying golden ram that rescued Phrixos, (taking him to the land of Colchis) and Helle, the children of the Boeotian king Athamas and provided the Golden Fleece. Under the tropical zodiac, the Sun transits this sign from approximately March 20 to April 21 each year.

According to the tropical system of astrology, the Sun enters the sign of *Aries* when it reaches the March equinox, which occurs on average on March 21 (by design). As the Earth takes approximately 365.24 days to go around the Sun, the precise time of the equinox is not the same each year, and generally will occur about six hours later from one year to the next until reset by a leap year.

In Western astrology, *Aries* is considered a “*masculine*”, positive (extrovert) sign. *Aries* is considered a fire sign, and is one of four cardinal signs. Aries is ruled by the planet Mars.

*Aries*, released not long after *Pisces*, continues in the same vein, creating ambient psychedelic noise soundscapes.

**Virgo** [कन्या (Kanyā) quality Dvisvabhava (dual)] is the sixth astrological sign in the Zodiac, originating from the constellation of **Virgo**. It spans the 150–180th degree of the zodiac. Under the tropical zodiac, the Sun transits this area on average between August 23 and September 22, and the Sun transits the constellation **Virgo** from approximately September 16 to October 30.

**Virgo** is traditionally ruled by the planet Mercury, but Ceres is its modern ruler and several other planets have been suggested as the ruler of **Virgo** by some modern astrologers. Being the sixth sign of the zodiac, **Virgo** has been associated with the astrological sixth house.

The symbol of the maiden is based on Astraea. In Greek mythology Astraea was the virgin-goddess of justice. During the Golden Age she dwelt upon the earth with mankind, but was driven away by the lawlessness of the later Bronze Age. Zeus then placed her amongst the stars as the **Virgo** constellation.

**Virgo**, released after **Aries**, continues within the realms of psychedelic ambient noise.

**Sagittarius** [धनुष (Dhanuṣa) **quality** Dvisvabhava (dual)] is the ninth astrological sign in the Zodiac, originating from the constellation of **Sagittarius** and spans 240–270th degrees of the zodiac. Under the tropical zodiac, the sun transits this sign between approximately November 23 and December 21. In western astrology, the sign is now no longer aligned with the constellation as a result of the precession of the equinoxes. **Sagittarius** is considered a “masculine,” positive (extrovert) sign. It is also a fire sign and one of the four mutable signs.

**Sagittarius** is ruled by the planet Jupiter. In Greek mythology, the Centaur Chiron was the son of Philyra and Saturn, who was said to have changed himself into a horse to escape his jealous wife, Rhea. He mentored Achilles, a Greek hero of the Trojan War, in archery. Chiron was eventually immortalized in the constellation of Centaurus or in some version, **Sagittarius**.

Along with **Aries** and **Leo**, **Sagittarius** is a part of the Fire Trigon as well as the last of the **reproductive trinity** (The **Reproductive Trinity** begins at the autumnal meridian, September 22, and ends at the winter solstice, December 21). It also follows **Gemini** and **Virgo** as third of the mutable signs, which are the signs that feature changeable quality.

**Sagittarius** is a further exploration in the realm of ambient psychedelic noise.

*Ophiuchus* has sometimes been used in sidereal astrology as a thirteenth astrological sign in addition to the twelve signs of the tropical zodiac. The constellation *Ophiuchus*, as defined by the 1930 International Astronomical Union's constellation boundaries, is situated behind the sun from November 29 to December 18.

*Ophiuchus* is the fifth release from **10 Echo** and is another exploration into the dark ambient noise filled.

**Gemini** [ग्यनि] (*Mithuna*) quality Dvisvabhava (*dual*) is the third astrological sign in the Zodiac, originating from the constellation of **Gemini**. Under the tropical zodiac, the sun transits this sign between about 21 May and 21 June. **Gemini** is considered a “masculine”, positive (extrovert) sign and an air sign, and is one of four mutable signs.

**Gemini** has been closely associated with the planet Mercury and is considered to be ruled by it. Being the third sign of the zodiac, **Gemini** has been associated with the astrological third house. **Gemini** were the twin brothers Castor and Pollux in Greek mythology, known as the Dioscuri, and sometimes known as Iabal and Ivbal. Because of the spacecraft’s ability to carry two astronauts, **NASA** named its two-person space capsule **Project Gemini** after the zodiac sign.

**Gemini** is sixth installment in the **10 Echo Production** series.

**Aquarius** [কুম্ভ (Kumbha) **quality** Sthira (fixed)] is the eleventh astrological sign in the Zodiac, originating from the constellation **Aquarius**. Under the tropical zodiac, the Sun is in the Aquarius sign between about January 21 and about February 20, while under the sidereal Zodiac, the sun is in Aquarius from approximately February 15 to March 14, depending on the leap year. **Aquarius** is considered a “masculine”, positive (extrovert) sign. It is also considered an air sign and is one of four fixed signs.

**Aquarius** has been traditionally ruled by the planet Saturn, and, since its discovery, Uranus has been considered a modern ruler of this sign. Being the eleventh sign of the zodiac, Aquarius is associated with the astrological eleventh house. **Aquarius**, the water carrier represented by the zodiacal constellation **Aquarius** is Ganymede, a beautiful Phrygian youth and son of Tros, King of Troy in Greek mythology with whom Zeus fell in love with while Ganymede was tending to his father's flocks on Mount Ida. In the disguise as an eagle (represented by the constellation Aquila) the king of gods carried Ganymede off to Olympus to be cup-bearer to the gods.

**Aquarius** is a constellation of the zodiac, situated between Capricornus and **Pisces**. It was one of the 48 constellations listed by the 2nd century astronomer Ptolemy, and it remains one of the 88 modern constellations. At an apparent magnitude of 2.9, Beta Aquarii is the brightest star in the constellation. **Aquarius** is found in a region often called the Sea due to its profusion of constellations with watery associations such as Cetus the whale, **Pisces** the fish, and Eridanus the river.

**Aquarius** is the seventh in the astronomically (*astrologically*) themed **10 Echo Production** series.

**21. Assimilation (from Four Responses to  
Interovmeliommosis) (07:45)**

Cancer [কক্ষ] (*karka*); quality movable] originates in the constellation of **Cancer** and is the fourth sign in the Zodiac. The constellation spans from 90° to 120° celestial longitude. Based on the Greek myth, the symbol of **Cancer** is based on the Karkinos, a crab that was crushed under the foot of Hercules, and whose remains were placed in the sky by Hera, forming the constellation of **Cancer**. Under the tropical zodiac, the sun transits this area between approximately June 22 and July 22. Belonging to the triplicity of the water trigon, **Cancer** is a cardinal water sign.

One of four elemental trigons in the zodiac is the water trigon, the other three being fire, earth, and air.

Due to the negative associations with the word "*Cancer*", astrologers refer to Cancerians as "moon children". In Hindu astrology the sign of **Cancer** is named Karka and its Lord is Moon. **Cancers** ruling planet is the Moon. **Cancer** is said to be the house of Neptune and the exaltation of Jupiter.

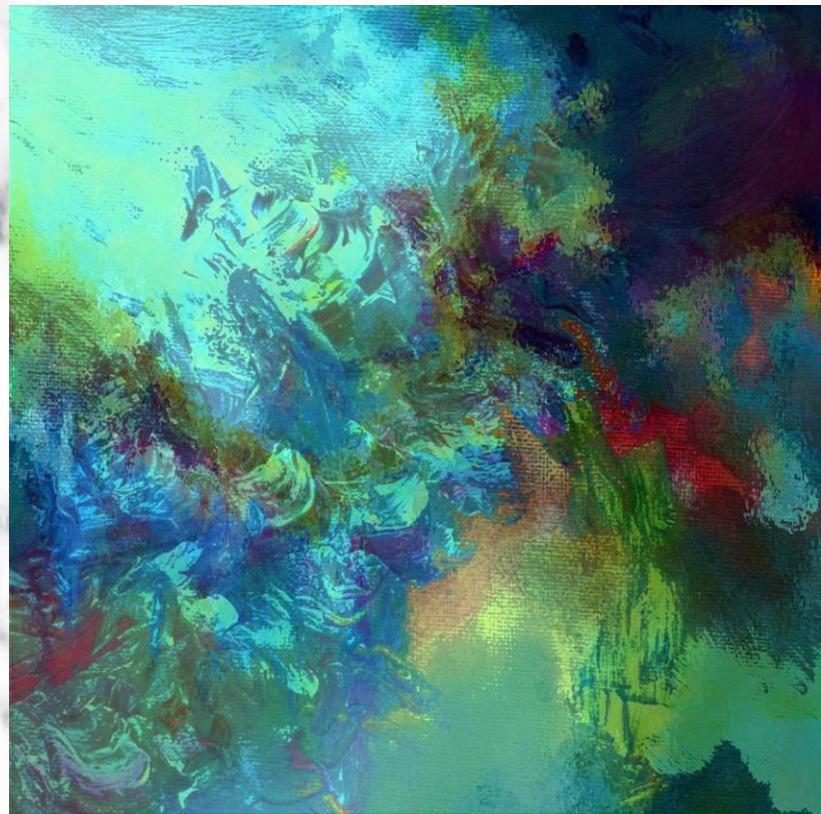

Perceived as “pushing the sun across the heavens” which initiates the summer solstice, in early history the sign of **Cancer** was represented as a turtle in Mesopotamia, and as a scarab beetle in Egyptian culture.

**Cancer** is the eighth release in this astronomically (astrologically) themed **10 Echo Production** series. The songs traverse contrasting landscapes of sound, creating unique portals which lead into sonic dreams.

Featuring the bonus material, “*When Arietis, Virgineus, Piscis, Sagittarius and Geminorum has encircled the Sun*” which was taken from the **Akashic series** release, 2018’s **Compendium of The Akashic Processions and Ancillaries**; and the track, “*Assimilation*”, an interpretation and response to the Ov Moi Omm track, “*Interovmtoiommosis*”. The track appears on **Ov Moi Omm** 2021’s **Interovmtoiommosis** Ep.

As a further added bonus, three unreleased tracks! The track, “*Nothing*” and two tracks, “*Archy is my metal Archaeopteryx*” and “*Archy becomes a hero*”. These two intertwined tracks were inspired by an old **Amon Düül II** tune called “*Archy the Robot*” from the 1974 Lp **Hijack** about a mischievous toy robot who kidnaps and humiliates the devil to great applaud and is now out for God. The reason none of these bonus tracks made the cut for the **Cancer** album was that they (concepts) simply didn’t fit.
